SMC 15MinuteStocks Market Update and Watchlist Report Returns (Above)

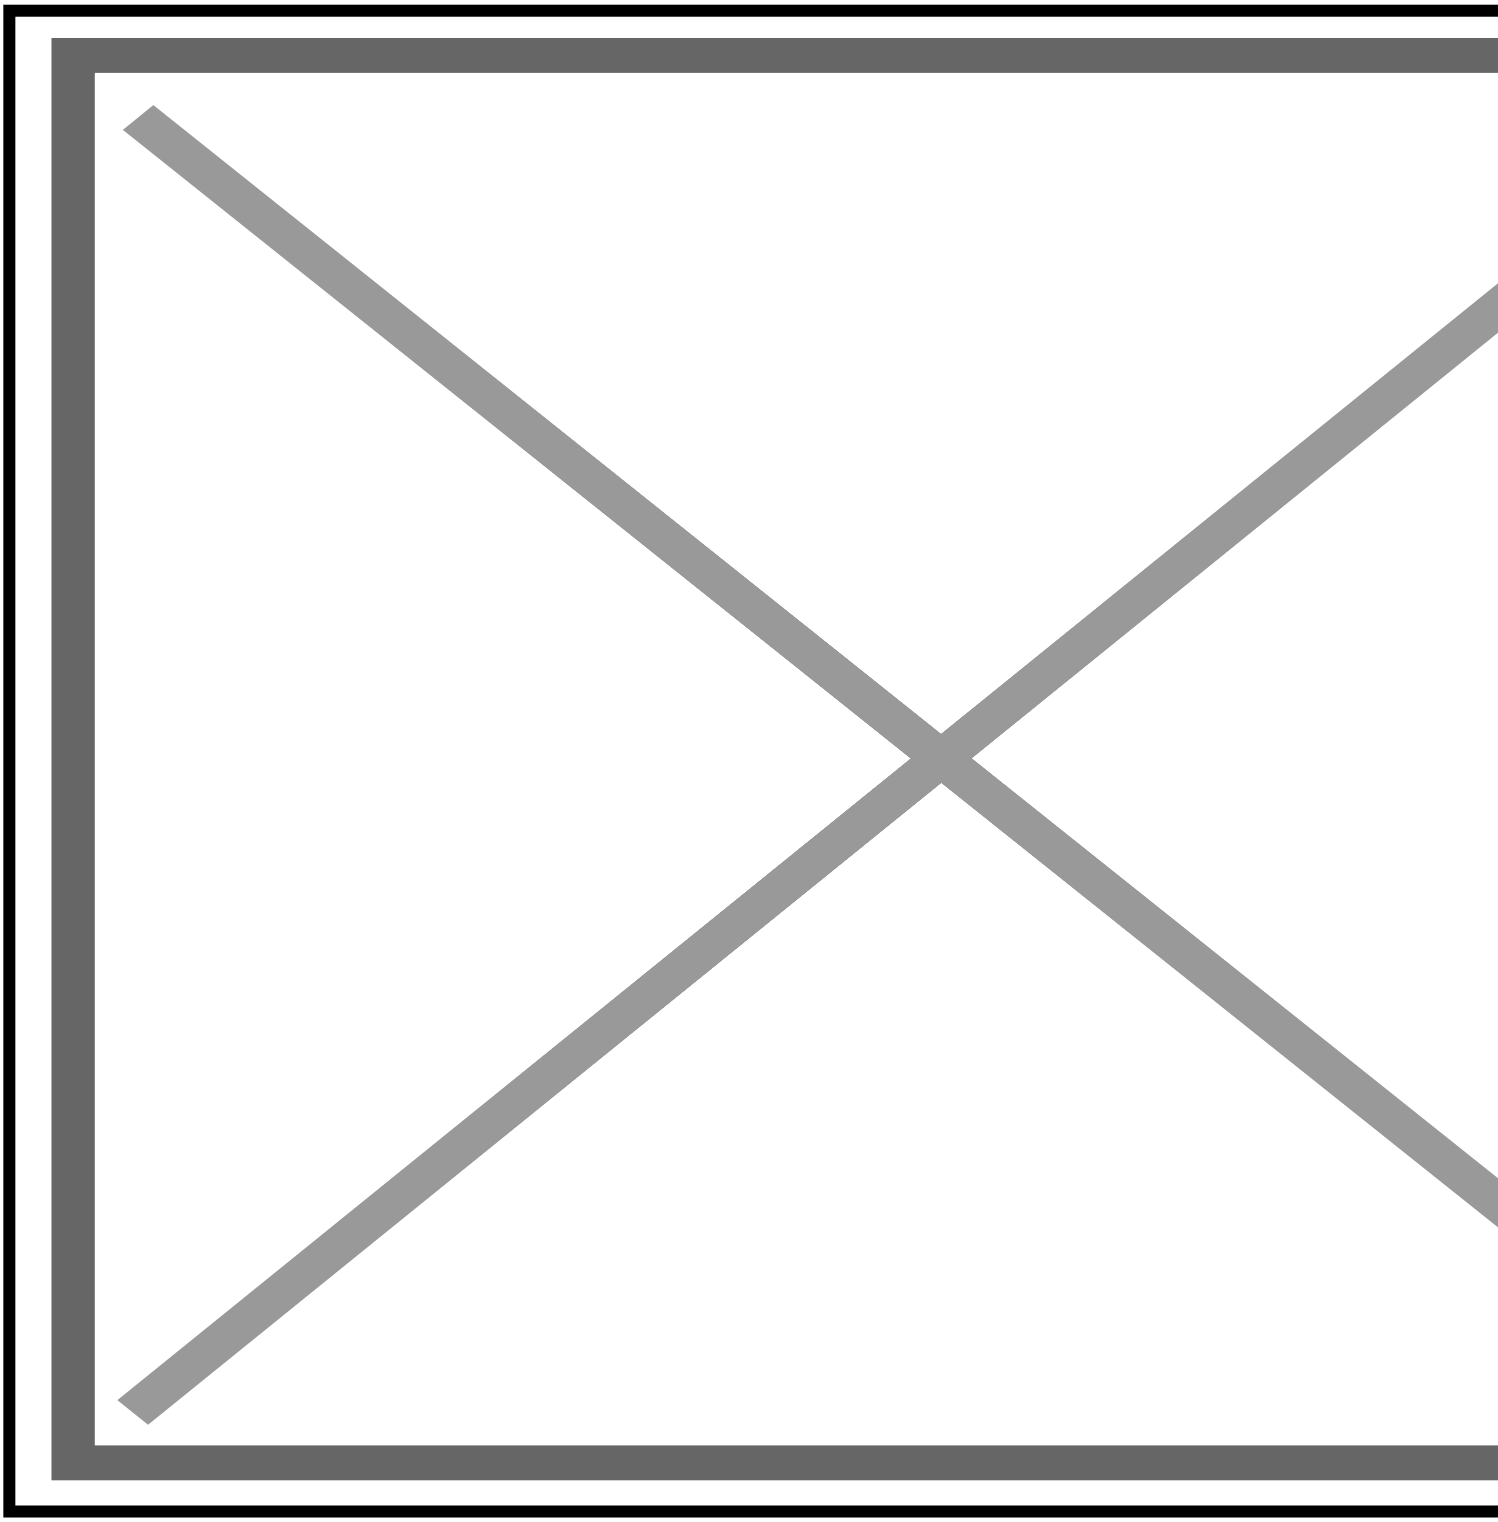
Finally! In October 2009, at the request of family and friends who wanted to get in on our daily work and success, we created the SMC 15MinuteStocks Market Update and Watchlist report and started publishing our investment ideas every day. Our returns based on publicly presented entries and exits represents +61%**! During the same period, an investment in the S&P 500 ETF resulted in a +21.8% return.

Try Your FREE 2 Week Trial Today â€¦ Cancel within 2 weeks at no cost; Our service is a month-by-month subscription that you can cancel at any time â€“ no problem!   What does it cost? $49.95/Month! At this cost, you canâ€™t afford to miss it.

Starting capital of $10,000.- would now be worth approx. $16,000.- (less commissions and differences in entry and exit prices)

Starting capital of $5,000.- would now be worth approx. $8,050.- (less commissions and differences in entry and exit prices)

Short term performance looks great. How about SMCâ€™s long term performance? Here is the performance chart for the Stock Market Companion investments from 1995 through 2009â€¦. +642%!! WOW!



Our start capital was approximately $70,000 and by the end of 2009, this $70,000 had grown to approximately $519,000 (not including withdrawals). **That is a cumulative return of 642%*.**

Starting capital of $10,000.- would now be worth approx. $64,200.- (less commissions and differences in entry and exit prices)

Starting capital of $5,000.- would now be worth approx. $32,100.- (less commissions and differences in entry and exit prices)

For comparative purposes we have included data that we had for the Fidelity Magellan Fund and the S&P 500. From 1995 to 2000, for charting purposes (and until we get accurate data) we have simply given them the same returns as the SMC.

The returns for the Madgellan Fund and the SP-500 show why there is such frustration among investors who have, in many cases â€œriden outâ€• the two major market calamaties over the past 10 yrs, by remaining fully invested during those periods. For those investors who started in 2005, 2006, or 2007, there is sore disappointment. In their case, they didnâ€™t have the appreciation from 2003 and 2004 to â€œabsorbâ€• some of the losses.

However, we do believe that you can learn to grow your own money. It is important to start with a start capital that is entirely discretionary, which means that it is money that you can afford to lose (all of it). Remember, where there is work being done, mistakes are made. It is unwise and inaccurate to think that you will not make mistakes.

At the Stock Market Companion, we do not promise that you will have the same performance. *Our historical results are no guarantee of future peformance.

**2009-2011 Performance shown from all published entries and exits. The actual performance of subscribers will vary based upon individual decisions taken â€“ including investment proportions. The results show here are based on approx. 10% portfolio investment in each investment taken, when not specified.
