

About Me

Description

Like you, I wanted to learn how to successfully invest in stocks and make my money grow.

I started stock investing in 1986, and it wasn't easy for me. I made many mistakes and stopped investing until I had developed a proven system to make good investing decisions based on facts and to reduce my risk. I developed my proven S.I.M.P.L.E. Stock Investing Method that you can learn too!

Since then, I have made a lot of money in stocks, using my S.I.M.P.L.E. Stock Investing Method. I am a homeschool father of 5, former community college CFO, Vice President, Business Development Manager in Europe (10 years), and Mechanical Engineer.

You can learn to be successful investing in stocks, by developing a clear understanding of the stock market and learning a method for consistently finding and evaluating excellent stock investment candidates.

My comprehensive Stock Market Companion "Stock Investing Course teaches you my proven S.I.M.P.L.E. Stock Investing Method and much more!

This engaging course teaches you successful stock investing starting at the very beginning, explaining in appropriate detail " why there are publicly traded companies, the initial public offering process, how to read and understand company quarterly and annual financial reports, over 50 key business finance terms, the stock market and how to use the S.I.M.P.L.E. stock investing method that I created and that I continue to use successfully today.

This course is flexible and designed to fit your busy schedule. You will learn the key principles of value and growth stock investing. You will learn important insights and details about the stock market, how to find and quantify what a profitable and excellent publicly traded business looks like, and to be able to decide for yourself the best time to purchase shares.

Investing in stocks involves risk, so be careful. You could lose some or all of your money! Always simulate and practice what you have learned with “paper trading” before deciding to put real money at risk. This course teaches you how to do this.

While I’ve made a lot of money stock investing, an additional significant benefit from business analysis and stock investing for me has been learning excellent business practices, and applying these principles to help businesses, colleges, and individuals. I wish for you the same.

Onward!

CFO Eric
