

Story-Stock Investing

Description

We are passionate about stock investing and helping you (individuals and families) learn, understand and profit from the stock market and common stocks in a new way.

We call it “Story-Stock Investing”. We have grown our money at an average approx. rate of +22% per year for 15 years and have helped others SEE how to grow theirs significantly “ on their own.

Our “15Minute Market Update” subscribers log-in from any Internet device for our insights about the markets and individual “Story-Stocks” that we are following at Stock Market Companion.

Many use our work at Stock Market Companion and our 15Minute Market Update program as a financial training program for themselves and their family members. It includes the valuable tools “

- **3x / week Stock Market Companion 15Minute Market Update “ Online. This includes a structured process for understanding the markets, complete with our commentary, highlights, and charts.**
- **Stock Market Companion 15Minute Market Update “ Archives**
- **Stock Market Companion Watchlist**
- **Successful Investing Webinars**
- **Successful Investing Quizzes**
- **Access to see when and where we put our own money to work for growth or protection!**

We encourage our subscribers to be ready for a handful or two good ideas a year and to *take action* on them, if they are comfortable to do so on their own, or simply watch and learn. For instance-

SMC Subscribers profited or learned from our “short” in silver on May 2, 2011, using an leveraged exchange traded fund (ETF) that investors can purchase in any trading account or self-directed IRA. Our returns came fast on this one, because our timing was right. Within 3 days our

returns were +26%.*

SMC subscribers profited from our 77% (approx.) returns*, investing in Ford from November 9, 2009 through April 27, 2010. [Click here on our SMC Ford Daily Chart](#) to see how our subscribers were shown how we were doing it.

SMC subscribers learned on March 5, 2010 that Apple Inc.'s move above \$215/share was an excellent entry in our special Apple Report for subscribers. Recently Apple shares have reached over \$300/share.

On April 29, 2010, our subscribers learned that we were completely raising cash. Our ideas had "dried-up", and our indicators were showing the market ready for a strong adjustment. We saved our subscribers a lot of heartache as we were out of the market during the "Flash-Crash" on May 6th and the market pull-back through August 2010.

When the market found a temporary bottom in July 2010, we notified our subscribers of our entry into two stocks that roared higher. Within four to six weeks, one of the stocks had increased approx. +90%* and the other approx. +110%*. We took our profits. It's rarely that good, but when the opportunities are there we highlight them and take action. You can too.

Try it for free! [Start YOUR FREE 14 Day TRIAL TODAY!](#)

(Our free trial requires your credit card number up front. By providing your billing information now, you will avoid interruption in your membership. Cancel anytime during the 14 days and you will not be charged.)

Once your free trial is complete, your subscription is only \$49.95/month! Month-by-Month Subscription. Here too, you can cancel anytime. Simple and easy.
