

Why Use Stock Market Companion?

Description

Why Use Stock Market Companion?

[vc_row][vc_column][vc_column_text]

Successful investor and excellent teacher “

My name is Eric Stasak and I am passionate about stock investing and am a successful investor (see my results, below). I also love to teach about successful stock investing using a proven investment system that I have created, called the S.I.M.P.L.E. Stock Investing Method.

Many have learned from me how to invest based upon strategic developments in the market and at individual companies.

I teach and write using the editorial “œwe”.

With the inexpensive, well designed and practical tools that you find here at Stock Market Companion, you will learn the foundations of how the stock market works and combine that knowledge with a powerful system that helps you clearly and purposefully analyze a company investment for the 6 key investment components of the method. When these 6 key investment components “œline-up”, you may have a great investment opportunity at hand and have the confidence to take action!

It is through a clear understanding of how the markets work and consistent application of our S.I.M.P.L.E. Stock Investing Method that we have identified excellent investments that have significantly multiplied our capital.

Using the stock market, I grew my money at an average approx. rate of +22% per year for 15 years from 1995 – 2009 and have helped others SEE how to grow theirs significantly – on their own. I helped people avoid the 2008 – 2009 stock market crash, and led them back into the market in March 2009, for very significant returns*.
